GLOBAL ONLINE NETWORK FOR TEACHERS IN CLIMATE EDUCATION

www.s-cool-links.org

What is S-Cool-Links?

What is S-Cool-Links?

The [S-Cool-Links platform](#) is a fun and exciting **interactive online tool** where secondary school teachers get the opportunity to:

1. access scientifically correct information about climate change

2. access documented examples of climate change teaching activities across the curriculum

3. share knowledge on climate change and climate education with and learn from teachers in other countries through global connections

4. use school climate projects as valuable resources in teaching and learning curriculum

3. share knowledge on climate change and climate education with and learn from teachers in other countries through global connections

4. use school climate projects as valuable resources in teaching and learning

S-Cool-Links is a safe online space for teachers to learn about climate education, where inclusion of different perspectives is being encouraged and respected.

Interesting article for agriculture teachers!

Inspiration: Information articles

 S-Cool-Links • Level 10 • 5 months ago

The world's climate-stressed and pollution-degraded farming and agricultural system must shift quickly to sustainable practices to feed an additional 2 billion mouths expected by 2050, a new United Nations report finds. Read the full article here: <https://yaleclimateconnections.org/2022/01/un-report-the-worlds-farms-stretched-to-a-breaking-point/>

Scientifically correct information about topics related to climate change as resources and inspiration for teachers to enhance their own knowledge

Arbor Week

Tyron Greyling · Level 7 · a month ago

Our learners were part of our national arbor week from 30 August to 5 September. They were shown how to properly prepare a tree for planting and then giving some indigenous trees to plant at our school.

Thandi Nkwanyana

Wow thats awesome Tyron

S-Cool-Links *

Wow, this is a wonderful activity, Tyron. Can you share more about the types of indigenous trees that will be planted at your school? Did you maybe use the arbor week to start a conversation with the students about what trees can mean for the climate, for people, the economy etc? We found this interested visual online that could maybe help to take the conversation with students further:

Coaching and moderation to help teachers spark their creativity and enable them to produce meaningful ideas to strengthen their climate teaching practices.

Supporting a global online teacher community in climate education:

Can ANY teacher provide climate change education? YES!

Inspiration: Activity ideas

S-Cool-Links * · Level 10 · 5 months ago

It is a common misconception that climate change education belongs in STEM-classes. In fact, any subject has the potential to integrate the topic of climate change. Arts, music, history, languages, you name it! But the question is: how do you integrate this topic in all these subjects? Well, Finnish environmental educator Pinja Sipari developed this open resource called 'Teacher's Climate Guide' where you can find a lot of information on the subject of climate change and plenty of inspiration, ideas and material to integrate the topic of climate change within your subject. To access the full resource, click <https://teachersclimate-guide.fi/> And don't forget to invite your fellow teachers to this platform (picture credit: The Orenda Tribe - Art for A Cause)

Have you checked out this event? Free climate change education workshop for teachers! Announcements

Valuable teaching resources and access to workshops, seminars or other learning events for educators.

Supporting a global online teacher community in climate education:

Small financial support to teachers who wish to collaborate on a climate project and share about their teaching practices on the platform → project-based learning. ,

**S-Cool-Links as a useful tool to sustain
outcomes from other climate education
initiatives: what do teachers have to say?**
